

Why AI?

AI Technician Services at Fayebrook Farms
can make a small possibility
a happy reality.

The Ultimate

PROVING GROUND

Conception rates, a healthy pregnancy and successful foaling can be improved by the knowledgeable use of artificial insemination.

Choosing AI means:

- a mare and stallion never come into contact with each other, therefore breeding accidents are minimal
- there is less chance of spreading sexually-transmitted diseases
- mares do not have to undergo the stress of travelling to a stallion
